**SECURITY INFORMATION**

25X1A

Responsibility for dissemination as implied in the proposed regulation No. [REDACTED] means that the DCI has assigned the following tasks to the AD/CD:

- (a) To provide a central point for the receipt of all intelligence material in the Agency except as specifically stated in this regulation and its corresponding procedural regulation No. [REDACTED]
- (b) To distribute this material from this central point bringing to bear on such distribution:
  - (1) Known requirements and needs;
  - (2) Recommendations of producers and interested parties; and
  - (3) Recommendations of I&S.

25X1A

These three factors are to be carried out by consultation, oral or written.

It is believed that implementation of the proposed regulations as written will not alter existing procedures, and that these proposals should be examined as a whole for they do embody such exceptions within the overall pattern as [REDACTED] sensitive source material handling, special materials coming within NSCID #9, CIA internal use only, limited distribution for special cases, etc.

STATSPEC

It further appears that we should not overlook the fact that higher authority than that of the AD's exists in all cases where (and it should seldom happen) adjudication of differences becomes a necessity.
